Sponsored full-time opportunity for Indigenous students

Become a steward of the land

Are you interested in a career where you can help take care of the land?

Environmental site assessment technician training

March 15–September 30, 2021

You will learn to perform site assessments, investigate environmental issues, collect soil and water samples, and much more. Training will be delivered through distance learning and hands-on field work under guidance of a professional mentor.

When you enrol, you gain conditional acceptance into our Land and Water Resources Diploma program. Safety training, gear, and transportation for field work provided. Space is limited, apply today.

To find out more or apply by March 5, contact Richard Resener, project coordinator, by emailing **rresener@nlc.bc.ca** or calling **250·500·3660**.
