Calgary, Alberta, T2P 4J8

Dear Ms. Jorgensen,

**RE: OBSERVATION WELL STATUS WITHDRAWAL
CNRL ET AL W EAGLE 6-6-85-18 (WA# 4010)
EAGLE WEST – BELLOY A**

BC Oil and Gas Commission (Commission) staff have received Canadian Natural Resources Limited's (CNRL) request for withdrawal of the observation well designation for the well CNRL et al W Eagle 6-6-85-18 (WA# 4010), in the Eagle West field, Belloy 'A' pool. CNRL has been unable to obtain a reservoir pressure for the Belloy formation due to a blockage in the tubing that prevents downhole recorders from being landed.

The Drilling and Production Regulation Part 1 defines an observation well as "a well or a portion of a well designated as an observation well under section 2 (7)".

- 2 (7) An official may designate a well as an observation well if
- (a) the well is being used to monitor reservoir pressures or to obtain other formation information, and
 - (b) the well is not used to produce from, or inject or dispose of fluids into, a formation being monitored.

The observation well designation for CNRL et al W Eagle 6-6-85-18 (WA# 4010) is withdrawn as the well cannot be used to monitor the reservoir pressure of the Belloy 'A' pool.

Should you have any questions, please contact Kathryn Archibald at (250) 419-4406 or the undersigned at (250) 419-4430.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Ron Stefik', written over a horizontal line.

Ron Stefik, Eng. L.
Supervisor, Reservoir Engineering
Oil and Gas Commission
