

Report Name

List of Orphan Sites

Report Description

This report lists all designated orphan sites (individual pad sites), each of which may contain well(s), facility equipment, and/or pipeline segments. The status of decommissioning and restoration progress is provided

Measures and Definitions

1. Site Type – Indicates whether the site contains one or more wells, or in the case where no well(s) are present, only facility or pipeline equipment.
2. Inactive – Decommissioning work remains at the site.
3. Decommissioned – All well(s) and facility equipment have been permanently plugged and/or removed from the site, allowing for restoration work to progress.
4. Assessed – Indicates a site has been decommissioned and an investigation completed to confirm the environmental quality before reclamation
5. Reclaimed – Decommissioning work is complete and the surface soils have been reclaimed for planting or all reclamation work, required monitoring, and issuance of Certificates of Restoration have been completed, where applicable.

4/4/2022

Report Name

List of Wells on Orphan Sites

Report Description

This report lists the wells that are located on Orphan Sites, where permanent plugging (abandonment/decommissioning) is managed by the Orphan Fund. The current status of each well is provided

Measures and Definitions

1. ABAN – the well's reservoirs has been permanently plugged and the wellhead has been cut below surface (referred to as abandoned or decommissioned)
2. ABNZ – the well's reservoirs have been permanently plugged, but the wellhead has not yet been cut and capped below surface (referred to zonally abandoned or decommissioned)
3. INAC – production was suspended at the well; the well is inactive and awaiting decommissioning
4. CANC – the well permit was cancelled and was not drilled

4/4/2022
