Dear Sir:

Re: Amendment of Concurrent Depletion Approval
Inga Unit No. 3

Further to our letter on the above subject dated November 13, 1974 and our phone conversation on February 7, 1975 approval is granted to cease replacing, by water injection into Inga Unit No. 1, any gas cap voidage caused by production of gas from Inga Unit No. 3. This approval is effective January 1, 1975 and will be in effect for a two year period which may be extended following satisfactory performance. All other terms of the existing approval remain in effect.

If you have any queries please contact me.

Yours truly,

A.J. Dingley,
Chief Engineer
