

Application Management System Training

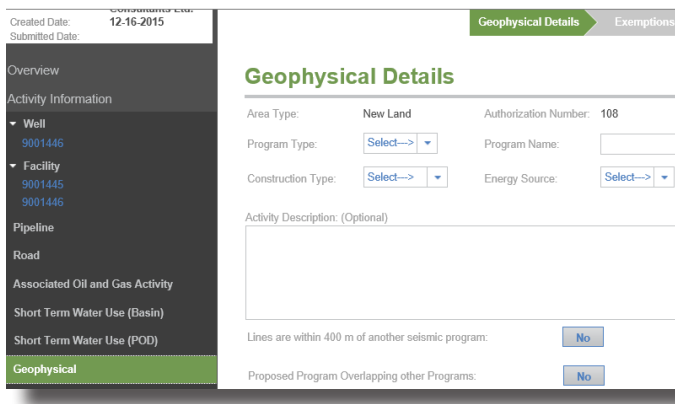

Completing OGAA Geophysical Information

Application information in AMS is a combination of spatially driven data, technical data and administrative data entered into the system. Each activity requires a set of technical information which must be entered by the user. This guide will outline how to input geophysical technical information into AMS. **For more details see the relevant section in the Oil and Gas Activity Application Manual.**

PREREQUISITE: Users must have created an application and successfully uploaded spatial data.

Step 1. Find Geophysical in Activity Information

In the left hand menu of the Application page, under *Activity Information* click on *Geophysical* in the navigation panel. Once clicked, a horizontal tab menu will load indicating what geophysical details are required.

Step 2. Complete the geophysical technical details

The tabs on the top menu correspond to technical details required for geophysical applications. The *Geophysical Details* and *Geophysical Land Details* sections need to be completed, as well as two sub-sections, *Geophysical Details* and *Exemptions*. All fields are mandatory unless specified *Optional*.

- ***Geophysical Details* section**

Complete the technical details for each geophysical point by filling in all mandatory fields.

Complete the guidance requirements and exemptions for each geophysical application by filling in all mandatory fields.

- ***Geophysical Land Details* section**

Complete the geophysical land details for each geophysical application.
