Dear Mr. Clements

**RE: NON-HAZARDOUS WASTE DISPOSAL TESTING DEFERRAL
SECURE DAWSON B11-4-79-14; WA# 27084
PADDY-CADOTTE FORMATION**

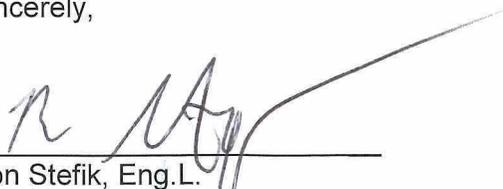

The Commission has reviewed the Secure Energy Services Inc. email, dated June 6, 2016, requesting a 6 month extension of the hydraulic isolation log requirement for the subject well.

As per condition 2 l) ii) of Order 11-02-008 Amendment #2 for disposal well Secure Dawson B11-4-79-14 (WA 27084), a hydraulic isolation log is required to be performed at an interval of every 5 years commencing from the date of initial disposal operations. Disposal operations commenced in October 2011, this log is due by October 2016. As stated in your email, Secure seeks to extend this deadline in order to perform the temperature log in conjunction with the bi-annual pressure test, in approximately May of 2017. The Commission agrees that performing these tests at the same time will help to minimize operational disruptions while providing quality test data. Secure is hereby approved to delay the test, with a new deadline of **July 1, 2017**.

Please ensure that the 2016 packer isolation test follows the BC guideline set out in Appendix D of the [Water Service Wells Summary](#) document. This includes both a 10 minute test and a 24 hour test. Any issues with the packer isolation test may negate this extension approval.

Should you have any questions, please contact the undersigned at (250) 419-4430 or Michelle Harding at (250) 419-4493.

Sincerely,

Ron Stefik, Eng.L.
