## Registration Required for Petrinex B.C. Inclusion Project

**EFFECTIVE DATE: IMMEDIATELY**

The BC Oil and Gas Commission (Commission) is advising operators that registration is now required to prepare for the launch of Petrinex in November 2018.

The [Petrinex B.C. Inclusion Project](#) was announced in Dec. 2016 and is a joint government and industry system supporting Canada's oil and gas industry. Petrinex will replace B.C.'s current reporting system used by industry to report volumetric activities, such as production, storage, transport, and valuation of oil and natural gas. The Petrinex system is currently used in Alberta and Saskatchewan.

In order to access Petrinex in November, the Commission is advising operators they must register now by completing the Business Associate (BA) Data Collection form posted on the [Commission's Petrinex readiness webpage](#). All operators that submit oil and gas volumetric reporting must register as a BA in order to gain access to Petrinex in November. BA forms should be completed and sent to the Commission via email to [BAUPDATE@bcogc.ca](mailto:BAUPDATE@bcogc.ca) by **April 30, 2018**. This will ensure data can be tested and converted to Petrinex in a timely manner. Petrinex Change Leaders have been informed of this via email.

In addition, the Commission is encouraging operators to review information for their company in preparation for Petrinex. This will ensure data moved into the new system is current and accurate. Operator information is listed in Conversion Information Files on the [Commission's Petrinex readiness webpage](#). If you have concerns with specific data that is missing or in error, please email [Petrinex.Conversion@gov.bc.ca](mailto:Petrinex.Conversion@gov.bc.ca).

All files and detailed instructions for reviewing the BA Data Collection form and Conversion Information Files can be found on the [Commission's Petrinex readiness webpage](#).
