Dear Mr. Stinn:

**RE: APPLICATION FOR COMMINGLED PRODUCTION
ENCO WINDFLOWER d-87-A/94-O-11; WA# 3330**

The Commission has reviewed your application dated January 27, 2002, requesting permission to commingle gas production from the Belloy/Fantasque and Mattson zones encountered in the subject well.

The Commission designates the gas pools encountered by this well to be Belloy "A" and Mattson "A" of the Windflower field. Gas compositions and pressures of the two pools should be similar. Commingled completion is expected to increase recoverable gas reserves from an otherwise marginal Belloy zone.

We wish to advise you that your application to commingle production from these pools is hereby approved, under the authority of Section 41 of the *Drilling and Production Regulation*, subject to the following conditions:

1. Production from the Belloy (428.5 – 429.8 mKB) and Mattson (434.7 – 481.6 mKB) zones may be commingled.
2. Gas, condensate and water production should be allocated on the Ministry of Provincial Revenue BC S-1 and BC S-2 forms on the basis of Belloy 5% and Mattson 95%.
3. This approval may be modified at a later date if deemed appropriate through a change in circumstances.

Sincerely,

P.S. Attariwala
Supervisor
Reservoir Engineering
